

Exercise sheet for 2025.10.13 – Basics

1) Write a program that reads a number of seconds and prints it in the form mins : seconds.

Example : 200 seconds $\rightarrow$ 3 : 20 {Hint – use // to get the mins and % to get the seconds}

2) Write a program to take a 2 digit integer and then print the reversed number.

Example : 25 $\rightarrow$ 52

3) Write a program to take x , y , z values from the user and calculate the expression $8x+7xyz+3z$

4) Write a program to obtain temperatures of 7 days (Monday, Tuesday....) and then display the average temperature of the week
