

1) Write Python code to add the odd numbers up to and including a given value N and print the result

2) Write a program to find the lowest number from a list of numbers

3) Write a python program to print the Fibonacci series' first 20 elements : 0,1,1,2,3,5,8.....

4) Write a Python script to print the first ten Mersenne Numbers eg : 2-1, 4-1, 8-1, 16-1, 32-1,

The first 10 numbers are

1,3,7,15,31,63,127,255,511,1023

5) Write a Program to print the following pattern:

*

**

6) A year is a leap year if it is divisible by 4. BUT years divisible by 100 are not leap years unless they are also divisible by 400. Write a program that asks the user to input a year and print if it's a Leap year or not

7) Write a program to input length of 3 sides of a triangle . Check if these sides will form a triangle

(Rule : $a+b>c$; $b+c>a$; $c+a>b$)

8) Write a short program to input a digit and print it in words

9) Given an input check if it is a palindrome or not. Some examples of palindromes are :RACECAR, 1234321 (They read the same in both directions)

10) Write a Python script to input temperature. Then ask the user what units Celsius or Fahrenheit, the temperature is in. The script should convert the temperature to the other unit.

Conversions: $F = 9/5C+32$ and $C = 5/9(F-32)$
